

NRS Driver Assessment and Training Program: Teamwork matters

For over 30 years, NRS has provided a full range of rehabilitation services to adults and children with serious injuries or disabilities. Our experienced Driver Occupational Therapists and instructors are key members of the team.

The NRS Driving team has over 15 years Driving Program experience. They will work closely with you, your family and others on your treatment team to help you at each stage of your recovery – from pre-driving contemplation to independence on the road.

The NRS Driver Program is appropriate for individuals with the following driving related challenges:

- Physical challenges, e.g. Spinal Cord Injury, Amputations and Orthopedic Injuries.
- Cognitive challenges e.g. Brain Injury, Learning Disabilities and Mild Cognitive Impairment.
- Psychological challenges e.g. Driver Anxiety or Phobias.

The Occupational Therapists and driving instructors provide:

- Consultation input regarding driver readiness (e.g. whether a driver assessment is indicated or whether the client requires specific therapy/training in pre-driving skills first).
- Driving Assessments, including a comprehensive assessment of the physical, cognitive and psychological abilities as they relate to driving.
- Driver Training, focusing on the unique physical, cognitive and psychological needs of each client.
- Specific programming to address driver anxiety or phobia.
- Vehicle modifications.

NRS has been providing home, work, school and clinic based rehabilitation services to adults and children with brain injuries, spinal cord injuries, orthopaedic injuries, burns, amputations, psychological/psychiatric disorders and other complex injuries for over 30 years. We have helped thousands of people to successfully rebuild their lives.
