

NRS Physical Therapy Services: Teamwork matters

For over 30 years, NRS has provided a full range of rehabilitation services to adults and children with serious injuries or disabilities. Our experienced chiropractors, physiotherapists, kinesiologists and registered massage therapists are key members of the team.

Individuals with injuries including brain or spinal cord injuries, orthopedic injuries, burns, amputations, chronic pain, cognitive and/or psychological/psychiatric disorders may have unique physical challenges. These individuals often require support from a physical therapy team that has experience working with complex needs and who work as part of a team. Functional goals may include improving your mobility and returning to fitness, sport and/or work.

In person assessment and treatment is provided in our clinic, as well as in the home and community (e.g. fitness centers, pools). We also offer virtual treatment to support home and community fitness programs.

Working closely with your medical and rehabilitation team, as well as your insurer and legal representative, our experienced physical therapists provide:

- Assessment and treatment aimed at alleviating pain and improving strength, range of motion, balance, coordination, transfers and mobility.
- Consultative and direct support for home and community based fitness programs or sports.
- Mobility aids, home exercise and pain management equipment and orthotics.

Let our caring and competent team show you that there is indeed a world of possibilities!

Call now for a free 30 minute consultation.
