

NRS Psychology Services: Teamwork matters

For over 30 years, NRS has provided a full range of rehabilitation services to adults and children with serious injuries or disabilities. Our experienced Psychologists are key members of the team.

Individuals with injuries including brain or spinal cord injuries, orthopedic injuries, burns, amputations, chronic pain and psychological disorders have complex physical, cognitive, emotional and behavioural challenges. These individuals often require support from a Psychologist with extensive experience working with individuals with complex needs and who will work closely with other members of your team.

Assessments and counseling are offered in the home and our clinic, as well as virtually.

Working closely with the medical and rehabilitation team, employer, teacher, insurer and legal representative, our experienced Psychologists provide:

- A comprehensive assessment of the client's mental status, behaviour, symptoms and challenges.
- Psychological Diagnoses, including diagnoses of accident-related conditions such as Somatic (Pain) Disorders, Post Traumatic Stress Disorder, Anxiety or Depression.

- Client and family education to support informed decision making in the rehabilitation process.
- Counseling to help clients adjust to losses experienced because of injury or illness, maintain or enhance their physical, intellectual, emotional, social and interpersonal functioning, and improve their quality of life.
- Unlike psychiatrists, they cannot prescribe medication.

Let our caring and competent team show you that there is indeed a world of possibilities!

NRS has been providing home, work, school and clinic based rehabilitation services to adults and children with brain injuries, spinal cord injuries, orthopaedic injuries, burns, amputations, psychological/psychiatric disorders and other complex injuries for over 30 years. We have helped thousands of people to successfully rebuild their lives.
